DRAFT DELIBERATIVE

Greetings all - Happy Friday!

Here's an update - sorry it's taken me a while. Thanks to Rick for the newer and better slide 10.

We're working here on a bullet-proof presentation. The current thought is that the Phase III/IV/V comparison slide can benefit from some graphs that show more granularity. Linda and her folks are working on that and we'll send that to everyone for their consideration when it's ready. It'll be slide 15.

USGS has been made aware that we're still working on the ppt and they are fine with postponing the meeting with them to allow for the presentation to get finished, and for the technical meetings between our folks to take place (presumably next week).

Attached is the latest. Slide 16 has some suggested changes that we can discuss.

Here's the expected next steps:

Monday - let's have our group meet to review where we stand on the ppt. Hopefully we'll have slide 15 updates to review.

Early next week - get ppt over to USGS.

Later in week have technical meetings with USGS.

Week of Dec 10 - USGS/EPA meeting. Date TBD.

Have a good weekend all. I'll send an invite for Monday. Thanks for your enduring patience.

Best,

jose
